The scheme is a medium density, low rise, dispersed form of accommodation creating a village type development of 64 units, ten of which will be low level dementia bungalows. The dementia units are laid out in a secure garden with controlled access through their own dedicated communal area.

The communal facilities for the other units adjoin the low level dementia area and provide multi-purpose spaces to allow for social and community activities. Across the scheme, the dwellings will be hardwired and have a telecare overlay.
