Call24
24 hour help when you need it

A growing number of people need to store a spare set of keys to their home for a variety of reasons:

Peace of Mind - We all need someone to have access to our homes from time to time. Whether that be friends, family or emergency services. What is important is that you choose who you let into your property.

Security - Storing a spare set of keys in a hidden location outside your home can compromise your security. By installing a KeySafe it ensures that your keys are kept safe, secure and can only be accessed by those persons who you give the KeySafe code.

Convenience - With a KeySafe, a spare set of keys can be accessed at any time during day or night but only by those persons who you trust.

We recommend that the KeySafe be installed as part of the Call24 alarm installation but it can also be purchased separately

Telecare Alarms

Telecare Alarms from Call24 are suitable for anyone of any age, including the elderly, individuals with an illness or a disability and people living in remote locations. For more information on KeySafe or our telecare packages please contact us on the number below.
